	blocks	TP2022T16-119	Document navigation - sections/outlines	In Progress
Sprint:	TP2022T16 Sprint 7		
Story point estimate:	1		
Rank:	0|i000mv:		

Description

To create and show the table of contents (outlines) from PDF it needs to be available.

Actual results:

When I call the function pdf.getOutlines() it returns null.

Expected results:

The function returns an array of outlines with chapter and subchapter titles.

Story point estimate:	2		
Sprint:	TP2022T16 Sprint 7, TP2022T16 Sprint 8		
Rank:	0|i000jb:		

Description

- navigate through document by sections of it/outlines/ table of contents
- create a button in taskbar to show clickable sections of document

Update 02/04/2022:

- table of contents is available (if PDF has outlines)
- navigating through sections is in W.I.P state. There are unresolved problems with pdfjs getDestination() function. Currently, when user clicks on the specific section it navigates him to hard coded page (navigating logic is implemented) .
- moving this task to the Sprint 8 to complete navigating to the correct page
